

CREATIVITY IN CURRICULUM THROUGH VIDEO GAME DESIGN

Course Code: T&L 2900, Creativity through Video Game Design

This STEM course empowers educators to include creative design and storytelling through building video games with Bloxels EDU to enhance collaboration, creativity, and student communication. Bloxels EDU is successful with iPad, Chromebook, and PC classrooms.

LEARNING GOALS:

- ✓ Explore the design functions of Bloxels video game builder
- ✓ Collaborate & Create video games integrating into the curriculum
- ✓ Design & Animate characters to enhance curriculum in core content subjects
- ✓ Retell major historical events through creative storytelling
- ✓ Navigate characters through scientific experiments
- ✓ Integrate authentic math problem solving into video games
- ✓ Empower students to focus on storytelling aspects of a video game
